

MBJ Airports Limited hosts Airport Council International Developing Nations Airport Assistance Programme (ACI-DNA)

Montego Bay, Jamaica. March 10, 2016 - MBJ Airports Limited (MBJ), operator of the Sangster International Airport, is pleased to announce its hosting of the Developing Nations Airport Assistance Programme (DNA) 32nd training seminar, organized and facilitated by Airports Council International (ACI) at the RIU Hotel, Montego Bay on April 25-26, 2016.

With the accelerating growth of aviation worldwide, the need to increase airport excellence in the fields of management, economics, safety, security and operations in developing countries is increasing. This by-invitation-only seminar entitled "Airport Statistics" is intended for senior airport professionals involved in the production and analysis of airport traffic and economic data. The seminar will include topics such as airport and air carrier statistical nomenclature, measurement of air transport demand, key performance indicators (financial and economic measures) and traffic forecasting and seasonality.

The ACI DNA Programme's objective is to support member airports in developing countries. Its mandate is to manage ACI's assistance programme effectively to achieve meaningful, sustainable results and engage in the development of ACI member airports in developing countries, enabling those members' effort to realize their development objectives. This will be achieved by working with ACI's regional offices in ACI Africa, ACI Asia-Pacific and ACI Latin America Caribbean along with CIFAL-Atlanta United National Institute for Training and Research (UNITAR).

MBJ is committed to advancing the training and development of its employees and assisting with aviation development and training in Jamaica while ensuring regulatory compliance. MBJ is also an approved ACI training centre for 2016 and will be hosting several training courses at the Airport in collaboration with ACI throughout 2016.

For additional details on the DNA seminar, email DNA@aci.aero or visit the link <http://www.aci.aero/Services/DNA-Assistance-Programme>.

For additional details on the ACI Global Safety Network (GSN) courses to be held at the Sangster International Airport throughout 2016, please email kjackson@mbjairport.com or visit the link <http://www.mbjairport.com/aci-training>.
