

Sangster International Airport to Accept Electronic Boarding Passes Effective

November 24, 2015

November 23, 2015 MBJ Airports Limited, operator of Sangster International Airport, is pleased to announce that effective November 24, 2015 electronic boarding passes will be accepted as part of the security screening process. This follows the approval of the Jamaica Civil Aviation Authority to allow passengers travelling on or after the effective date to use boarding passes as displayed on electronic hand-held devices for screening by airport security personnel.

Passengers will be able to check in online for their flights and arrive at the airport and proceed directly to the security screening area or check their bags first and then proceed to the security screening area.

This initiative is one of several being undertaken to improve the overall passenger experience at the Montego Bay Airport to maintain our recognition as the leading Airport in the Caribbean. Announcements will be made regarding the other initiatives at the appropriate time. As the operator of one of the most important assets in Jamaica, we are always seeking to improve the level of service at the Airport.
